

FUN WITH WIRE: Simple Clasps and Findings

Emerald Coast Bead Society – April 16th 2018

Presented by Meredith Hartsfield

In this class we will explore basic wire techniques, expanding our skills while we create our own unique findings. Your finished pieces will take on a new special look and you will no longer be dependent on the findings available at your local craft store or sight-unseen online!

MATERIALS LIST:

- _ 18-gauge copper wire (avoid base metal, “craft” wire)
- _ Beads (4mm and larger to fit on the wire)

Tools:

- _ Round, chain and flat nose pliers
- _ Wire cutters/snips
- _ Jewelry files or emery paper
- _ Ruler, Sharpie
- _ work surface (mat to protect table from hammering), task light

If you have a steel block and chasing hammer please bring, I have one set.

Meredith will have wire and beads to share for a nominal fee but please bring your own tools.

See you then!
