

JULY WORKSHOP: POLYMER CLAY NATASHA BEADS

Let's celebrate July by making the most exciting polymer clay bead you can ever create: the amazing Natasha Bead! By rolling and cutting polymer clay in a specific way you can produce unimagined one-of-a-kind results. All clay, tools, and materials will be provided in a \$5 kit as we do three variations of a Natasha. Incredible beads, pendants, and fan pulls will be taken home to be baked. Appreciated, but not required, are task lights, acrylic rollers, and any scrap polymer clay or canes you wish to use. The \$5 kit includes conditioned Premo clay, various bails, ball chain, textured clay backs, and eye pins with many other supplies available to use on site. No pasta machines will be needed. This is a very hands on lesson!
